

Joining the Teamsters Could Mean Less Flexibility

Today, you work directly with your nurse leader about individual needs related to schedules, time off, and other issues that come up every day.

A UNION CONTRACT COULD PREVENT:

... receiving an additional pay increase between review cycles.

... the ability to leave work early to accommodate your child's sports event or go to a concert.

... the ability to flex to another unit to work more hours and/or overtime.

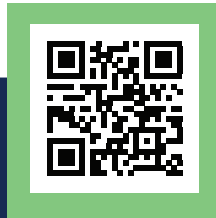

... a supervisor from assisting with patient care when a unit is short staffed or to cover for you.

... modifying your shift start or end time to accommodate an urgent need or personal matter.

Protect Your Schedule Flexibility

Vote “No.”
