

Because you asked...

Key points

for 2024 Corewell Health East Benefits

Corewell Health covers **84%** of the cost of your health care. Other employers typically cover **80 percent**.

»» Our 2024 HMO medical plan deductibles remain **UNCHANGED** if you receive care at a Corewell Health facility.

»» Benefit deductions are spread **across all 26 pay slips instead of 24**. Spreading deductions across all 26 pay slips reduces the amount of money deducted from each pay slip.

»» After you meet your deductible, **we cap the cost for certain inpatient and outpatient services at \$2,000 for an individual and \$4,000 for a family.**

- After you meet coinsurance maximums, you are still responsible for office visit copays, but most inpatient and outpatient services are covered 100%.

Note: There are some rarely used services in which an out-of-pocket cost still applies after the coinsurance maximum has been met (Ex: a hospital bed in your home). For these extraordinary services, the total out-of-pocket maximum is \$9,100 for an individual and \$18,200 for a family. *Less than .001% of members will reach these out-of-pocket limits.* In those rare circumstances, **Corewell Health offers other team member support programs.**
